Education

- Geethanjali College of Engineering and Technology** 2023 – 2027
B.Tech, Computer Science and Engineering Hyderabad, India
 - CGPA:** 8.74/10
 - Coursework:** Operating Systems, Database Management Systems, Data Structures & Algorithms

Technical Skills

- Languages:** Java, Python, JavaScript (ES6+), SQL, C
- Frontend:** React.js, React Native, Expo, HTML5, CSS3
- Backend:** FastAPI, REST APIs, WebSockets, Node Js
- Databases:** PostgreSQL, MySQL
- AI & Computer Vision:** OpenCV, YOLOv8, Groq API, Whisper

Professional Experience

- India Meteorological Department (IMD)** Jan 2026 – June 2026
Project Intern Hyderabad, India
 - Built an automated GIS pipeline for meteorological data processing and weather map generation.
 - Reduced manual effort by **90%** by automating the generation of **10+ weather maps/day**.
 - Implemented scheduling, retry logic, logging, and error handling for reliable workflow execution.
 - Developed a real-time monitoring dashboard using HTML and JSON logs, reducing debugging and issue resolution time by **60%**.
- Nucleonix Systems Pvt. Ltd.** Feb 2026 – June 2026
Software Development Intern Hyderabad, India
 - Engineered a React Native application using Expo and TypeScript for a tablet-based Gamma Radiation Monitoring System.
 - Developed BLE-based communication for real-time radiation monitoring, implementing device scanning, pairing, telemetry visualization, and automatic reconnection workflows.

Projects

- JobMatch – Job Portal Web Application** 2025
PHP, MySQL, HTML, CSS, JavaScript
 - Developed a full-stack job portal with role-based authentication and responsive frontend interfaces.
 - Implemented backend workflows, SQL queries, and admin management features using PHP and MySQL.
 - Built search, form validation, and job application functionalities for usability and execution quality.
- AI-Powered Defense Communication & Incident Response System** 2026
React.js, FastAPI, PostgreSQL, OpenCV, YOLOv8, Groq API
 - Built a full-stack AI-powered defense platform using **React.js**, **FastAPI**, for real-time surveillance and incident management.
 - Integrated OpenCV and **YOLOv8** for object detection with automated alert generation, live monitoring, and secure communication.
 - Leveraged Groq Whisper and Llama 3.3 70B to automate speech-to-text, AI incident summarization, and PDF report generation.

Leadership Experience

- Team Lead, IEEE Xtreme 18.0 (Oct 2024)**
Led a 3-member team in a 24-hour global coding challenge among **8,793 teams**; achieved **Global Rank 250**, **India Rank 52**, and **1st at college level**.
- Overall Student Coordinator, ALPHAMATICA (Mar 2026)**
Led and managed **12+ teams** in organizing an inter-college fest; ensured smooth execution and received a **Letter of Appreciation**.
