EDUCATION

- Geethanjali College of Engineering and Technology** 2023 – 2027
B.Tech, Computer Science and Engineering Hyderabad, India
 - CGPA:** 8.74/10
 - Coursework:** Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks

TECHNICAL SKILLS

- Languages:** Java, Python JavaScript, C
- AI/ML:** PyTorch, Computer Vision, Generative AI, YOLOv8, OpenCV, Whisper, Llama 3.3, Gemini 2.0
- Backend & APIs:** FastAPI, REST APIs, WebSockets, React.js, React Native
- Databases & DevOps:** PostgreSQL, MySQL, Docker, Git, GitHub, Linux, Bash

PROFESSIONAL EXPERIENCE

- India Meteorological Department (IMD)** Jan 2026 – Aug 2026
Project Intern – GIS Automation Hyderabad, India
 - Developed and deployed an automated spatial data processing pipeline using Python, PyQGIS, and GDAL for meteorological map generation, reducing production time from 90 minutes to under 45 seconds across 20+ daily map products.
 - Engineered a fault-tolerant daemon architecture with scheduling, data validation, retry mechanisms, crash recovery, and automated alerting for reliable unattended execution.
 - Built real-time telemetry and monitoring dashboards using structured JSON logs, improving operational visibility and reducing debugging and issue-resolution time by 60%.
- Nucleonix Systems Pvt. Ltd.** Feb 2026 – June 2026
Software Development Intern – Real-Time Systems Hyderabad, India
 - Engineered a React Native (Expo, TypeScript) application for a real-time gamma radiation monitoring platform, integrating BLE-based telemetry, automated exposure logging, calibration workflows, and reliable sensor connectivity for safety-critical environments.

PROJECTS

- AI Defense Communication & Incident System** 2026
React.js, FastAPI, YOLOv8, Whisper, Llama 3.3
 - * Built a real-time surveillance-to-alert pipeline: YOLOv8 detection feeds a FastAPI service pairing Whisper speech-to-text with Llama 3.3 to auto-generate structured incident dispatches, minimizing latency end-to-end.
- GyanGuru – AI-Powered Learning Assistant** 2026
Flask, Gemini 2.0 Flash, AST Parsing, gTTS
 - * Engineered a multimodal AI tutoring platform (Gemini 2.0 Flash) with structured Markdown/LaTeX explanations, a Python AST-based dependency parser for PyPI detection, gTTS narration, and offline fallback.

LEADERSHIP EXPERIENCE

- Team Lead, IEEE Xtreme 18.0 (Oct 2024)**
Led a 3-engineer team through a 24-hour global coding challenge among **8,793 teams**; achieved **Global Rank 250, India Rank 52**, and **1st place** at the college level.
- General Organizer, ALPHAMATICA Fest (Mar 2026)**
Managed and coordinated 12+ teams for the successful planning and execution of an inter-collegiate technical fest, earning a Letter of Appreciation for leadership and organizational excellence.
